PTC to expand parking lot, remove tennis courts

PINE CITY, Minn. – Pine Technical College’s parking lot will undergo construction and an expansion this summer to accommodate the college’s record growth in student enrollment. The expanded parking area will replace the tennis courts currently located on the campus’ north end.

“We have experienced record-breaking growth over the last few years, and one unfortunate side effect of that growth is that our students have had some frustration with finding adequate parking,” says President Robert Musgrove. “While it’s hard to say goodbye to our beloved tennis courts, we must take full advantage of our resources and property to provide the best experience for our students,” Musgrove adds.

Construction will begin May 24, and the tennis courts will no longer be available for use on and after that date. Construction will continue through mid-June, and the project is scheduled for completion June 18.
